## RENEWABLE HEAT NY WEBINAR

Thursday,  
March 7, 2019

1:00 - 2:00PM

Register today by  
visiting:  
<https://bit.ly/2tnX3OZ>

Joining information will  
be shared after  
registration is  
complete.

## Update on the Renewable Heat NY Program

**Presented by: Sue Dougherty, RHNY Program Manager at  
NYSERDA & John Siegenthaler, P.E. Consultant to NYSERDA**

The Renewable Heat NY (RHNY) program has undergone significant changes since its inception in 2013. This webinar will discuss the latest program changes, the recent release of the Design Assistance Manual for High-Efficiency, Low-Emissions Biomass Boiler Systems, and future RHNY training opportunities.

- RHNY now offers increased incentives toward the installation of qualified high-efficiency, low-emission wood pellet and cordwood gasification boilers in both residential and commercial applications.
- The 240-page Design Assistance Manual for High-efficiency, Low-Emissions Biomass Boiler Systems provides design guidance and system templates developed from research projects and residential and commercial installations conducted throughout New York State. The system design templates described in the manual can serve as a starting point for successful system installations.
- To date, the RHNY program has trained over 300 heating professionals on the design and installation of biomass boiler systems. The RHNY Hydronics for High-Efficiency Biomass Boilers training and course materials have been continually updated to include lessons learned and best practices and will continue to be offered in 2019 and later.
